Education

Oregon State University – BS in Computer Science, Minor in Business - 3.61 GPA

Jun. 2023 - Dec. 2026

Experience

Data Engineer Intern, Intel Corporation - Hillsboro, OR

May. 2026 – Present

- Built Power BI financial reports supporting Intel's ERP migration, providing critical financial analytics to more than 1,000 employees across finance and business teams while modernizing enterprise reporting workflows.
- Standardized the design and user experience of enterprise Power BI dashboards used by 2,000+ Intel employees, improving report consistency, navigation, and access to financial information across business teams.
- Improved the user experience of Intel's internal Finance GPT platform, helping finance teams access information and interact with AI-assisted financial analytics through a more intuitive and consistent interface.
- Partnered with senior developers to modernize high-visibility financial reports used by Intel VPs and leadership, enhancing report usability and supporting data-driven financial analysis and business decisions.

Software Engineer Intern, Daimler Truck North America – Portland, OR

Mar. 2025 – Jul. 2025

- Designed and deployed a Power BI dashboard driven by SQL to monitor 1,000+ active truck build statuses, completion dates, and tariff-related supply chain disruptions, enabling faster prioritization decisions.
- Developed Python and Power Automate AI workflows to summarize operational updates from 5 data sources, routing emails to 30+ stakeholders, and enhancing cross-team coordination across international teams.
- Catalogued and defined structured operational data within ETL pipelines to ensure consistent schemas and metadata, enabling accurate retrieval and interpretation by LLM-powered AI services at scale.
- Contributed to API migration efforts by validating 25+ data flows and integrations during the Mercedes-Benz split, ensuring uninterrupted reporting and operational workflows across enterprise reporting systems.

Data Analyst, Oregon State University – Corvallis, OR

Jan. 2026 – Present

- Built and deployed 10+ SQL-backed Power BI dashboards and paginated reports in Microsoft Fabric.
- Migrated legacy Tableau reports to Power BI, validating data accuracy and performance through QA checks.
- Created wireframes, documentation, training for faculty/staff, improving adoption and reducing support requests

Web Experience Developer, Oregon State University – Corvallis, OR

Nov. 2024 – Present

- Supported migration and QA of high-traffic Oregon State University websites during a Drupal upgrade, validating functionality and ADA accessibility for platforms used by 10,000+ students, faculty, and staff.
- Built interactive website tours and documentation, allowing self-service and reducing support needs by 30%.
- Analyzed accessibility metrics via dashboards to identify and resolve compliance issues across multiple sites.

Projects / Extracurricular Activities

OSU Artificial Intelligence Club - Club Member

Sep. 2024 - Present

- Participate in applied machine learning projects focused on predictive modeling and LLM-based applications.

Using AI to Improve Supply Chains in the State of Oregon - Team Member

Sep. 2025 - Present

- Partnered with small farmers, Google teams, and the Oregon Department of Agriculture to design and prototype product aggregation software, helping small farms lower cost margins and improve market access.
- Built Google Cloud and Vertex AI to build data pipelines to improve agricultural supply chain matching.

Skills

Programming: Python, SQL, JavaScript, C++, HTML, CSS

Technologies / Frameworks: Power BI, Tableau, Git, Github, Linux/Unix, CI/CD, React, .NET, Google Cloud Platform, Google Firebase, Azure, Visual Studio, Figma, Node, Express, RESTful APIs, PyTorch
